GNU GPL release statement for program `arb'

17 August 2010

To whom it may concern:

The University of Melbourne, hereby disclaims all copyright interest in the program 'arb' written by Dalton Harvie. This software is released under the GNU General Public License (GNU GPL).

Definitions:

'arb' is a program designed to solve partial differential equations via the finite volume method. The program was conceived by Dr Dalton Harvie (Department of Chemical and Biomolecular Engineering, University of Melbourne) in December 2009 and continues to be developed by him. It relies on certain third party software, including the computer algebra system `Maxima' (http://maxima.sourceforge.net/) which is, itself, released under the GNU GPL.

The GNU General Public License (GNU GPL) is a 'free, copyleft license for software and other kinds of works.' (http://www.gnu.org/licenses/gpl.html)

Authorised: University of Melbourne, 17 August 2010, Dr David Cookson, Executive Director, Research.
